- Which video categories trended most often?

The most trending category in all most region is Entertainment, followed by people and blogs, music and news & politics.

- How were they distributed among regions?

United States had the most number of share of trending videos which has 23.75%, followed by France, Russia nad India while Japan had the lowest number of shared trending videos with only 10.81%

- What categories were especially popular in the United States? Were there any differences between the categories popular in the US and those popular elsewhere?

The most popular category in United States is entertainment which is the same case for most regions except Russia. Music was the second most popular in the US which is not the case in other regions where People and Blogs and News and Politics are the second most popular. The third most popular category which is How to style category, this category differs from the rest of the region which means the viewers of videos in other regions is isnt into fashion as it is in USA.
